ROUND TABLE 1: How Secure is the Cloud?

When: 15 May 2012, 8.00-10.30
Where: Sofitel Brussels Europe, Place Jourdan 1, 1040 Brussels (access map)

The first Round Table event on May 15th will focus mainly on the issue of security. Are existing security frameworks sufficiently adopted across all types of platforms? How does security in the cloud differ from end to end point security in the traditional environment? How secure are software as a service applications in the cloud? How secure are data centres? How do open standards support security? How do you cope with the plurality of devices that users now have access to? How do you cope with cyber-attacks?

SPEAKERS:
Eran Feigenbaum, Google - Director of Security for Google Enterprise
Nick Coleman, IBM - Global Cloud Security Leader for IBM
Cloud industry representative, to be confirmed

The session will be moderated by Graham Taylor, CEO of OpenForum Europe.
The Rapporteur will be Dr Efthymios Altsitsiadis, Katholieke Universiteit Leuven - Research Group Marketing, Faculty of Business and Economics.
